WORK EXPERIENCE

Lead Software Engineer

Los Angeles, CA • HackForLA • Remote • Oct 2022 - Present

React.js Vite Material UI JavaScript TypeScript Redux

- Led a front-end modernization effort by migrating apps from Create React App to Vite, reducing build times and improving developer experience.
- Helped design and implement a shared UI component system using Material UI, improving accessibility and consistency across multiple projects.
- Contributed to team collaboration by introducing code quality tools (linting, reviews, shared configs) and supporting remote onboarding workflows.

Software Engineer

Los Angeles, CA • TS Consulting • Remote • Jul 2021 - Present

WordPress PHP UI/UX JavaScript Client-Facing Site Maintenance

- Built and maintained WordPress sites with custom themes and integrated plugins to support e-commerce and client needs.
- Addressed UX and layout issues for a legacy PHP coaching platform, improving site usability and content delivery for end users.
- Built a check-in kiosk system for a live events company, streamlining attendee onboarding and reducing queue times.

PROJECTS

...

Next.js Tailwind CSS TypeScript Redux Google Calendar API

- Built a full-stack scheduling tool for personal use, with therapist-side availability controls, travel buffers, and calendar integration.
- Designed around real-world constraints for solo practitioners and flexible appointment management.

...

React Material UI

- Created a lightweight tool to help writers monitor keyword usage in real time and stay aligned with SEO goals during content creation.

...

HTML Shiki YAML VSCode Extension

- Built a visualizer that converts YAML-based test cases into syntax-highlighted HTML for Cursorless, a voice-powered dev tool.
- Improved contributor experience and test readability in an open source project focused on accessibility and developer ergonomics.
